Work Experience

NVIDIA Seattle Robotics Lab Summer 2019
Research Intern
- Developed IRIS algorithm for learning from offline crowdsourced robot manipulation data. Supervised by Dieter Fox.

Stanford Vision and Learning Lab Winter 2017 - Present
Stanford EE PhD
- Advised by Silvio Savarese and Fei-Fei Li

Apple Summer 2015
Software Engineering Intern on iOS Location and Motion
- Implemented some deep learning methods and presented to Craig Federighi, the SVP of Software.

Caltech High-Speed Integrated Circuits Summer 2014
Research Intern, Robert J. McEliece and David Rutledge SURF Fellow
- Spent a summer in Professor Ali Hajimiri's lab. Implemented a wireless feedback mechanism using a Raspberry Pi, Android tablet, Arduino Nano.

- Designed both hardware (PCB Design, digital and analog circuit development) and software (control, sensing, and optimization) interfaces and implemented wireless and serial communication protocols.
